

PRATHAM RAJBHAR

Ahmedabad, Gujarat 380026 | +91 9512518403 | pratham.rajbhar@gmail.com | <https://prathamrajbhar.me>

I am a third-year Computer Engineering student at Ganpat University, deeply passionate about software development with expertise in Android and web development using React Native and React.js. My academic journey has honed my programming skills and problem-solving abilities, allowing me to create user-friendly and versatile Android applications as well as responsive and dynamic web applications. Committed to staying abreast of industry trends and technologies, I am dedicated to producing relevant and innovative work. I am eager to apply my skills to meaningful projects and collaborate with like-minded professionals, seeking opportunities for learning and advancement in the field of computer engineering.

PROJECTS

Food Delivery App

Developed a food delivery application using React Native and Firebase, aimed at providing a seamless and efficient user experience for ordering food from local restaurants. The app includes features such as real-time order tracking, secure payments, and user reviews.

E-Commerce Website

Developed a dynamic and user-friendly e-commerce website using React and Firebase. The platform enables users to browse products, make purchases, and manage their orders with ease. It includes features such as product search, user authentication, secure payments, and real-time inventory management.

EDUCATION

September 2021 – July 2024

Diploma of Computer Engineering

- Distinguished member of Ganpat University
- Relevant coursework: Technical Degree below the Undergraduate of Computer Engineering
- CGPA: 9.4

August 2024 – Present

Bachelor of Technology of Computer Engineering

- Distinguished member of Ganpat University
- Relevant coursework: Impart Quality Education in the field of Computer Engineering.

SKILLS

- Web Development
- MERN Stack
- Artificial Intelligence
- Android Development
- Exceptional communication
- Project Management
